

2018/2019 Training Series

The mission of the Riley Child Development Center (RCDC) is to provide leadership education excellence in neurodevelopment and related disabilities to professionals in health care and other fields which enhance the quality of life for children with developmental disabilities and their families. As part of that mission we routinely partner to provide relevant training.

Riley Child Development Center Weekly Journal Club

Each Wednesday morning from 8am-9am staff and trainees will engage in didactic learning. As appropriate we will attend the Riley Hospital Grand Rounds held in the ROC Auditorium; alternatively we will have a journal club held in the RCDC classroom. **Red=**

Required, Yellow= Optional
